The Places Where Community Is Practiced Anna Steigemann, 2019-02-25 In this open access publication, the social cohesion of urban neighborhoods and their residents is examined, which is often viewed as vulnerable since increased mobility, individualization, wider socio-economic and demographic changes have fundamentally altered the basis for everyday social interaction in urban neighborhoods. Anna Steigemann gives scholarly attention to the concrete places where neighborly interactions still take place and to how these interactions affect local community building. She illuminates and explores the ordinary everyday interactions and social practices in and around shops and gastronomic facilities on a shopping street in Berlin-Neukölln, revealing how these businesses are important places where community is practiced, but also why they are increasingly threatened by commercial and residential gentrification.

**Drawing and Reinventing Landscape** Diana Balmori, 2014-05-19 How to tackle representation in landscape design Representation is a hot topic in landscape architecture. While computerization has been a catalyst for change across many fields in design, no other design field has experienced such drastic reinvention as has landscape architecture. As the world urbanizes rapidly and our relationship with nature changes, it is vitally important that landscape designers adopt innovative forms of representation—whether digital, analog, or hybrid. In this book, author Diana Balmori explores notions of representation in the discipline at large and across time. She takes readers from landscape design's roots in seventeenth-century France and eighteenth-century England through to modern attempts at representation made by contemporary landscape artists. Addresses a central topic in the discipline of landscape architecture Features historic works and those by leading contemporary practitioners, such as Bernard Lassus, Richard Haag, Stig L Andersson, Lawrence Halprin, and Patricia Johanson Written by a renowned practitioner and educator Features 150 full-color images Drawing and Reinventing Landscape, AD Primer is an informative investigation of beauty in landscape design, offering inspiring creative perspectives for students and professionals.

Transparency Colin Rowe, Robert Slutzky, Bernhard Hoesli, 1997 Transparency, by Colin Rowe and Robert Slutzky, originally published in English in 1964 (in Perspecta 8), followed by a German translation in 1968, is one of the main modern reference texts for any student of architecture. Rowe and Slutzky co-founded the architects group Texas Rangers at the University of Texas in Austin, together with John Hejduk, Werner Seligmann and Bernhard Hoesli. In conjunction with their teaching activities, the group members sought to develop a new method for architectural design and proceeded to test their models in the teaching environment. This edition of Transparency is provided with a commentary by Bernhard Hoesli and an introduction by the art and architecture historian Werner Oechslin.

**Designing Interior Architecture** Sylvia Leydecker, 2013-05-28 Designing interior spaces is a task that is equally relevant as architecture, landscape architecture, and urban design for those working professionally in the built environment. In this comprehensive work, an international and interdisciplinary team of authors presents the essential aspects of the various fields of contemporary interior architecture and design. The project examples are illustrated with brilliant photographs and plans. They have been selected according to consistent criteria for all chapters of the book and represent the essential building types, including exhibition stand design, as well as a broad range of today's design approaches. The authors place the collaboration between the various design disciplines at the center of focus. The appendix contains information for further research. Video, Architecture, Television Dan Graham, 2012-08 This title was first published in 1979. The original book was released in the series of publications Source Materials of the Contemporary Arts initiated by Kasper König and produced by the Press of the Nova Scotia College of Art and Design. The publication represents an important document in Dan Graham's artistic examination of the video medium. Graham's installations and performances with video from the years 1970 - 1978 are documented with numerous illustrations, photos, and brief descriptions. In addition, the volume contains an essay by the artist in which he examines the various possibilities and forms of representation offered by the video medium, and draws the boundaries between these and representational spaces in television, film, or architecture. The book also offers contributions by Michael Asher and Dara Birnbaum, as well as an annex with a biography and bibliography.

**Stocks for All: People's Capitalism in the Twenty-First Century** Petri Mäntysaari, 2021-12-31 Public stock markets are too small. This book is an effort to rescue public stock markets in the EU and the US. There should be more companies with publicly-traded shares and more direct share ownership. Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US, the book proposes ways to create a new regulatory regime designed to help firms and facilitate people's capitalism. Through its comparative and historical study of regulation and legal practices, the book helps to understand the evolution of public stock markets from the nineteenth century to the present day. The book

identifies design principles that reflect prior regulation. While continental European company law has produced many enduring design principles, the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors. The book therefore proposes a new set of design principles to serve contemporary societal needs.

Toward a Ludic Architecture Steffen P. Walz, 2010 “Toward a Ludic Architecture” is a pioneering publication, architecturally framing play and games as human practices in and of space. Filling the gap in literature, Steffen P. Walz considers game design theory and practice alongside architectural theory and practice, asking: how are play and games architected? What kind of architecture do they produce and in what way does architecture program play and games? What kind of architecture could be produced by playing and gaming?

Writing the history of Tecno, a company founded in 1953 by the Borsani brothers, does not mean just investigating the evolution of a significant player in the industrial production of furniture, but also tracing out a fundamental chapter in interior design at a global level. Many Tecno projects have been designed by some of the most prominent international architects and designers, including Vico Magistretti, Roberto Mango, Robin Day, Gio Ponti, Mario Bellini, Norman Foster, Ricardo Bofill, Jean-Michel Wilmotte, Emilio Ambasz, Giorgetto Giugiaro, Gae Aulenti, and Piero Lissoni. Not to mention Tecno has always had a strong bond with the world of art, which has found material form in a specific collection of furnishings designed by noted artists like Man Ray, Bruno Munari, François and Frédéric Morellet, and Luigi Veronesi. Today many Tecno products are exhibited in leading museums of the world: at MoMA, New York and San Francisco, the Victoria and Albert Museum, London, the Georges Pompidou Centre, Paris, the Neue Sammlung, Munich, the Museum of Decorative Arts, Montreal and the Triennale in Milan.

**A Thesaurus of English Word Roots** Horace Gerald Danner,2014-03-27 Horace G. Danner's A Thesaurus of English Word Roots is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In A Thesaurus of English Word Roots, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples

column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, A Thesaurus of English Word Roots places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

*Landscape Perspectives* Marc Antrop, Veerle Van Eetvelde, 2017-12-19 Climb a mountain and experience the landscape. Try to grasp its holistic nature. Do not climb alone, but with others and share your experience. Be sure the ways of seeing the landscape will be very different. We experience the landscape with all senses as a complex, dynamic and hierarchically structured whole. The landscape is tangible out there and simultaneously a mental reality. Several perspectives are obvious because of language, culture and background. Many disciplines developed to study the landscape focussing on specific interest groups and applications. Gradually the holistic way of seeing became lost. This book explores the different perspectives on the landscape in relation to its holistic nature. We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups. Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept.

**A History of the Trombone** David M. Guion, 2010 This book, the first in the American Wind Band series, is a comprehensive account of the development of the trombone, from its initial form as a 14th-century Medieval trumpet to its alterations in the 15th century; from its marginalized use in a particular Renaissance ensemble to its acceptance in various kinds of artistic and popular music in the 19th and 20th centuries. The book is fully illustrated with more than 80 images and includes an appendix of transcriptions of selected primary source documents with translations and a comprehensive bibliography.

**Soil and Culture** Edward R. Landa, Christian Feller, 2010-01-28 SOIL: beneath our feet / food and fiber / ashes to ashes, dust to dust / dirt! Soil has been called the final frontier of environmental research. The critical role of soil in biogeochemical processes is tied to its properties and place—porous, structured, and spatially variable, it serves as a conduit, buffer, and transformer of water, solutes and gases. Yet what is complex, life-giving, and sacred to some, is ordinary, even ugly, to others. This is the enigma that is soil. *Soil and Culture* explores the perception of soil in ancient, traditional, and modern societies. It looks at the visual arts (painting, textiles, sculpture, architecture, film, comics and stamps), prose & poetry, religion, philosophy, anthropology, archaeology, wine production, health & diet, and disease & warfare. *Soil and Culture* explores high culture and popular culture—from the paintings of Hieronymus Bosch to the films of Steve McQueen. It looks at ancient societies and contemporary artists. Contributors from a variety of disciplines delve into the mind of Carl Jung and the bellies of soil eaters, and explore Chinese paintings, African mud cloths, Mayan rituals, Japanese films, French comic strips, and Russian poetry.

Hesychasm and Art Anita Strezova, 2014-09-01 “Although many of the iconographic traditions in Byzantine art formed in the early centuries of Christianity, they were not petrified within a time warp. Subtle changes and refinements in Byzantine theology did find reflection in changes to the iconographic and stylistic conventions of Byzantine art. This is a brilliant and innovative book in which Dr Anita Strezova argues that a religious movement called Hesychasm, especially as espoused by the great Athonite monk St Gregory Palamas, had a profound impact on the iconography and style of Byzantine art, including that of the Slav diaspora, of the late Byzantine period. While many have been attracted to speculate on such a connection, none until now has embarked on proving such a nexus. The main stumbling blocks have included the need for a comprehensive knowledge of Byzantine theology; a training in art history, especially iconological, semiotic and formalist methodologies; extensive fieldwork in Macedonia, Bulgaria, Serbia, Greece, Turkey and Russia, and a working knowledge of Greek, Old Church Slavonic, Macedonian, Russian, Serbian, Latin as well as several modern European languages, French, German, Russian and Italian. These are some of the skills which Dr Strezova has brought to her topic.” Professor Sasha Grishin AM, FAHA Adjunct Professor of Art History School of Literature, Languages and Linguistics The Australian National University
