Personality Assessment Robert P. Archer, Steven R. Smith, 2011-05-20 Personality Assessment provides an overview of the most popular self-report and performance-based personality assessment instruments. Designed with graduate-level clinical and counseling psychology programs in mind, the book serves as an instructional text for courses in objective or projective personality assessment. It provides coverage of eight of the most popular assessment instruments used in the United States—from authors key in creating, or developing the research base for these test instruments. The uniquely informed perspective of these leading researchers, as well as chapters on clinical interviewing, test feedback, and integrating test results into a comprehensive report, will offer students and clinicians a level of depth and complexity not available in other texts.

**A Second Wind** Philippe Pozzo di Borgo, 2012-05-22 An inspiring, heartfelt, tragi-comic memoir by an aristocratic Frenchman who was paralyzed in a paragliding accident and has to adjust to his new circumstances with the help of his unlikely caregiver—a hot-headed Algerian immigrant with troubles of his own. The basis of the hit French film *Untouchables*, coming to the US from the Weinstein Company in summer 2012--

**Shocked Earth** Saskia Goldschmidt, 2022-05-17 Acclaimed Dutch author Saskia Goldschmidt explores the dangers of industrial gas extraction, changing farming methods and their impact on our environment, and what it means to have your identity intensely entwined with your place of birth, in this compelling family saga. Femke, her mother Trijn and her grandfather have very different ideas about how to run their family farm. Tensions between mother and daughter are growing; Femke wants to switch to sustainable growing principles, while her mother considers this an attack on tradition. To make matters worse, their home province of Groningen is experiencing a series of earthquakes caused by a gas extraction operation near their farm. While the cracks and splinters in their farmhouse increase, the authorities and the state-owned gas company refuse to offer the local farming community any help. In *Shocked Earth*, Saskia Goldschmidt investigates what it means to have your principles at odds with your closest kin. And how to keep standing when the world as you know it is slowly falling apart.

*Bodily Extremities* Florike Egmond, Robert Zwijnenberg, 2017-03-02 A strong preoccupation with the human body - often

manifested in startling ways - is a characteristic shared by early modern Europeans and their present-day counterparts. Whilst modern manifestations of this interest include body piercing, tattoos, plastic surgery and eating disorders, early modern preoccupations encompassed such diverse phenomena as monstrous births and physical deformity, body snatching, public dissection, flagellation, judicial torture and public punishment. This volume explores such extreme manifestations of early modern bodily obsessions and fascinations, and their wider cultural significance. Agreeing that an interest in physical boundaries, extreme physical manifestations and situations developed and grew stronger during the early modern period, the essays in this volume investigate whether this interest can be traced in a wider range of cultural phenomena, and should therefore be given a prominent place in any future characterization of the early modern period. Taken as a whole, the volume can be read as an attempt to create a new context in which to explore the cultural history of the human body, as well as the metaphors of research and investigation themselves.

**Happy Pi Day to You!** Bonnie Worth, 2020-02-04 Join the Cat in the Hat as he explains how to measure circles and calculate pi in this perfect choice for Pi Day celebrations and nurturing a love of math and numbers! The Cat in the Hat makes calculating pi—one of the most fascinating numbers in mathematics—as easy as pie! Using a piece of string and two sticks, the Cat first shows beginning readers how to draw a perfect circle. Then, using a can and a piece of ribbon, he shows how to measure a circle's circumference and diameter, and to use those measurements to calculate pi. Also included is information about the history of measurement and famous Pi Pioneers! Written in simple rhyme, Happy Pi Day is a natural choice for celebrating Pi Day (held annually on March 14), and for nurturing a child's interest in math. Fans of the hit PBS show *The Cat in the Hat Knows a Lot About That!* will be delighted at this new addition to the Learning Library series.

**Hollow City: The Graphic Novel** Ransom Riggs, 2016-07-12 After fleeing an army of terrible monsters, Jacob Portman and his peculiar friends find themselves lost at sea, but the only person who might be able to get them ashore safely, their illustrious headmistress Miss Peregrine, is stuck in the form of a bird! Hoping to find a way to get Miss Peregrine back to normal--or as normal as a peculiar can get--the children journey to London. But no matter where they go, trouble lurks after them... Cassandra Jean's evocative visuals once again work seamlessly with *Hollow City's* vintage photographs and Ransom Rigg's twisting fantasy narrative to make for a wholly immersive reading experience for fans of the original novels, fans graphic novels, and fans of reading a great story alike!

*Schools Making a Difference* Martin Thrupp, 1999-05-16 Does an effective school really come about through the actions of teachers and school leaders, or does it also require an advantaged student intake? This question reflects a longstanding research debate about whether or not the social class mix of a school's student intake has much effect on individual achievement. *Schools Making a Difference: Let's Be Realistic!* presents new evidence which suggests that school mix is likely to be important because of the way many school processes are deeply influenced by student intake characteristics. Low socioeconomic schools face numerous intake-related constraints which make them highly resistant to improvement efforts. By suggesting that 'failing' schools are often overwhelmed rather than ineffective, this book provides a sympathetic reappraisal of the performance of teachers and school leaders in such schools. It also offers a critical response to the often unrealistic claims of the school effectiveness and school improvement movement and a fresh critique of market reforms in education.

*Writings on Art* Per Kirkeby, 2012-09-06 This will be the first comprehensive collection of the writings by the Danish artist Per Kirkeby (b. 1938) in the English language. *The 8th Chakra* Jude Currivan, Ph.D., 2007-05-01 The 7 chakras of the human personality are familiar to anyone working with healing or spiritual awareness. But that consciousness is essentially incomplete. It is the universal heart of the 8th chakra that can offer us the missing key to remember who we truly are. In this astounding book, scientist, healer, and mystic Jude Currivan, Ph.D., reveals a revolutionary new perception of the cosmos, reconciling leading-edge science with Spirit and the perennial wisdom of all ages into a universal model of consciousness. She also explains how the energies of the 8th chakra offer us a path to spiritual mastery. Both accessible and profound, this groundbreaking work is a practical and empowering guide to our personal and collective spiritual wholeness and shows us how we can: • Understand and integrate the principles of cosmic consciousness • Reconcile science and Spirit to show not only how the physical world is as it is, but why • Directly access and embody newly available cosmic energies and higher levels of transpersonal awareness • Manifest our soul purpose on Earth

**After the Divorce** Grazia Deledda, 2016-10-10 Before Elena Ferrante there was Grazia Deledda. When Giovanna's husband, Costantino, is convicted of a murder he claims he did not commit, she comes under pressure from her family to divorce him and marry a wealthy landowner who has always admired her. This she does, but the new marriage is an unhappy one and Giovanna remains firmly in love with Costantino. Following new evidence, Costantino is acquitted and returns to his home village, embarking on an affair with his former wife that seems destined to end in tragedy. In 1926, Grazia Deledda became the first Italian woman to be awarded the Nobel Prize for Literature. She was born in Sardinia and the life, people and customs of that Mediterranean island pervade her work. Praise for Grazia Deledda 'Before Elena Ferrante there was Grazia Deledda.' Matt Reimann 'Deledda belongs to more than just her own day. She does more than reproduce the temporary psychological condition of her period... what she does is to create the passionate complex of a primitive populace.' DH Lawrence The Nobel Prize in Literature 1926 was awarded to Grazia Deledda 'for her idealistically inspired writings which with plastic clarity picture the life on her native island and with depth and sympathy deal with human problems in general'.

The World of Carolus Clusius Florike Egmond, 2015-10-06 Egmond's study investigates horticultural techniques, fashions in the collection of rare plants, botanical experimentation and methods of scientific evaluation, as well as tracking the exchange of knowledge. Central to this activity is the figure of Carolus Clusius (1526-1609), the first truly scientific botanist.

**Why Life Speeds Up As You Get Older** Douwe Draaisma, 2012-03-29 Entertaining and educational, Douwe Draaisma's Why Life Speeds Up As You Get Older raises almost as many questions as it answers. Draaisma applies a blend of scholarship, poetic sensibility and keen observation in exploring the nature of autobiographical memory, covering subjects such as *déjà-vu*, near death experiences and the effect of severe trauma on memory recall, as well as human perceptions of time at different stages in life. A highly accessible and personal read, this book will not fail to touch or provoke thought in its readers.

The Cosmic Hologram Jude Currivan, 2017-02-16 How holographic patterns of information underlie our physical reality • 2017 Nautilus Silver Award • Includes myriad evidence from a wide range of cutting-edge scientific discoveries showing our Universe is an interconnected hologram of information • Explains how consciousness is a major component of the cosmic hologram of information, making us both manifestations and co-creators of our reality • Reconciles Quantum Mechanics and Einstein's Theory of Relativity by showing that energy-matter and space-time are complementary expressions of information Our understanding of the Universe is about to transform at all levels, from the tiniest Planck scale to the vast reaches of space. Recent scientific discoveries show that the information that upholds all of our modern technologies is exactly the same as the universal in-formation that underpins, pervades, and is all we call physical reality. Exploring how information is more fundamental than energy, matter, space, or time, Jude Currivan, Ph.D., examines the latest research across many fields of study and many scales of existence to show how our Universe is in-formed and holographically manifested. She explains how the fractal in-formational patterns that guide behavior at the atomic level also guide the structure of galactic clusters in space. She demonstrates how the in-formational relationships that underlie earthquakes are the same as those that play out during human conflicts. She shows how cities grow in the same in-formational ways that galaxies evolve and how the dynamic in-formational forms that pervade ecosystems are identical to the informational structures of the Internet and our social behaviors. Demonstrating how information is physically real, the author explores how consciousness connects us to the many interconnected layers of universal in-formation, making us both manifestations and co-creators of the cosmic hologram of reality. She explains how Quantum Mechanics and Einstein's Theory of Relativity can at last be reconciled if we consider energy-matter and space-time as complementary expressions of information, and she explores how the cosmic hologram underlies the true origin of species and our own evolution. Concurring too with ancient spiritual wisdom, the author offers solid evidence that consciousness is not something we "have" but the fundamental nature of what we and the entire Universe are. With this understanding, we can each transform our own lives and help co-create and in-form the world around us.
