Special Edition Using Groove 2.0 Bill Pitzer, 2002 Special Edition Using Groove gives the reader a quick overview of what Groove is capable of. This content will be comprised of screenshots and other graphics to explain the concepts. More technical readers will be able to more quickly develop applications with the Groove framework and completely understand how their new application operates behind the scenes. Tables and other supporting materials will be included to make this book an excellent flip-to-page-X reference. Programmers planning to develop with the Groove framework will need this book to jump-start his or her application development. Those who have read articles about Groove need this book to see real life applications of the product. Those who have been frustrated with Groove's poor documentation need this book. Bill Pitzer is a member of the Pervasive Technology Group at Divine/Whittman-Hart consulting, formerly marchFIRST. His background

includes certification in both networking (MCSE+I) and development (MCSD). As a consultant, he is responsible for educating Business Development personnel on the prospects of peer-to-peer technology. His MBA from Xavier University also gives him a background in business that makes him comfortable talking not only about the technical aspects, but also the strategic aspects of technology. Bill is also a regular contributor to WebTechniques magazine, Microsoft Web Builder, and ASPToday.com.

Numerical Methods in Contact Mechanics Vladislav A. Yastrebov, 2013-02-13 Computational contact mechanics is a broad topic which brings together algorithmic, geometrical, optimization and numerical aspects for a robust, fast and accurate treatment of contact problems. This book covers all the basic ingredients of contact and computational contact mechanics: from efficient contact detection algorithms and classical optimization methods to new developments in contact kinematics and resolution schemes for both sequential and parallel computer architectures. The book is self-contained and intended for people working on the implementation and improvement of contact algorithms in a finite element software. Using a new tensor algebra, the authors introduce some original notions in contact kinematics and extend the classical formulation of contact elements. Some classical and new resolution methods for contact problems and associated ready-to-implement expressions are provided. Contents: 1. Introduction to Computational Contact. 2. Geometry in Contact Mechanics. 3. Contact Detection. 4. Formulation of Contact Problems. 5. Numerical Procedures. 6. Numerical Examples. About the Authors Vladislav A. Yastrebov is a postdoctoral fellow in Computational Solid Mechanics at MINES ParisTech in France. His work in computational contact mechanics was recognized by the CSMA award and by the Prix Paul Caseau of the French Academy of Technology and Electricité de France.
